Subject: U&O FIP: Analysis Spreadsheets

Hi Cindy-

Just FYI...

Victoria is gathering the documents that need to go into the docket for the FIP: I drive > restricted share > U&O FIP > Docket Files-tracking VPC. Within that folder I created an Alexas Cindy folder which contains the docket version of the emission reduction analysis and cost analysis spreadsheets you and I had worked on.

I removed the reference to "Docket Version" when putting the spreadsheets in the Alexas Cindy folder, but I did rename the analysis spreadsheets under technical support documents > UB registration data to reflect that those versions were the ones used to put into the docket.

For any changes that need to be made in the spreadsheets from this point on, new copies with the changes need to be saved to both locations.

Thanks-

Alexas
